Subject: RE: Question about furniture refinishing / methylene chloride

Hi Niva – Sure – I'd be happy to talk with you about this project and share what we found out.
Are you available this afternoon – say 2:00 - for me to call you?

Thanks

Tod

Subject: Question about furniture refinishing / methylene chloride

Hi Tod –

I just left you a voicemail but thought sending an email would help provide more information. We received (from Terri Goldberg) a presentation that I think you put together on waste disposal of methylene chloride by furniture refinishers in NH. We were very interested to see the conclusions and the photos! I'm working on a proposed rulemaking to address the risks of methylene chloride and NMP when used as paint removers (in furniture refinishing and other sectors) and as part of the rulemaking we are having a small business panel to advise us on the potential impacts of our rule under development.

We're seeking small businesses that might be affected, and we have had trouble finding furniture refinishers. It would be great to talk to you about any contacts or suggestions you might have. Please call whenever you can; we're hoping to put our panel together quickly and it would be great to have your insight.

Thanks!

Niva
